Install LMS Bridge in Brightspace (D2L)

Learning Mastery Support · free & open-source LTI 1.3 / Advantage tool · lmsbridge.app

You need LMS-admin access. Replace YOUR-HOST with your LMS Bridge address. These URLs (also at /api/v1/lti/config and the admin LMS (LTI) tab) are what the LMS needs:

OIDC login URL	`https://YOUR-HOST/api/v1/lti/login`
Launch / Target Link URI	`https://YOUR-HOST/api/v1/lti/launch`
Redirect URI	`https://YOUR-HOST/api/v1/lti/launch`
Public keyset (JWKS) URL	`https://YOUR-HOST/api/v1/lti/jwks`
Dynamic Registration URL	`https://YOUR-HOST/api/v1/lti/register`

1) Register (Admin gear → Manage Extensibility → LTI Advantage)

1. Register Tool → Dynamic: paste https://YOUR-HOST/api/v1/lti/register, keep Configure Deployment, click Register (opens a new tab) → then enable the registration (disabled by default).
2. Copy the platform block (Issuer = your tenant host; Client Id; OpenId Connect Auth Endpoint; OAuth2 Access Token URL; Brightspace Keyset URL) into LMS Bridge.

Standard (manual) alt: Domain = YOUR-HOST; Redirect = /launch; OIDC Login URL = /login; Target Link URI = /launch; Keyset URL = /jwks; enable Assignment & Grade Services + Names & Role Provisioning.

2) Deploy (Admin gear → External Learning Tools → LTI Advantage)

1. New Deployment → Tool = your registration; tick AGS + NRPS; Security: send Name/Email/User ID + Org Unit Info.
2. Add Org Units (and descendants) the tool should appear in → Create Deployment; copy the Deployment Id into LMS Bridge.
3. On the deployment → View Links → New Link → URL = /launch → Save and Close.

Requires the Manage LTI Tools permission. Registration lives under Manage Extensibility; deployment under External Learning Tools.

Instructor places it

Course → Content → Add Existing → External Learning Tools → select the LMS Bridge link (or Insert Stuff / a Quicklink).

After any launch, LMS Bridge auto-provisions the user, course, and role (no extra password). Free & open-source under AGPL-3.0. UI labels verified against current vendor docs (2025–2026); confirm against your LMS version. Full guide: docs/INSTALL_LTI.md.
