Install LMS Bridge in Canvas (Instructure)

Learning Mastery Support · free & open-source LTI 1.3 / Advantage tool · lmsbridge.app

You need LMS-admin access. Replace YOUR-HOST with your LMS Bridge address. These URLs (also at /api/v1/lti/config and the admin LMS (LTI) tab) are what the LMS needs:

OIDC login URL	`https://YOUR-HOST/api/v1/lti/login`
Launch / Target Link URI	`https://YOUR-HOST/api/v1/lti/launch`
Redirect URI	`https://YOUR-HOST/api/v1/lti/launch`
Public keyset (JWKS) URL	`https://YOUR-HOST/api/v1/lti/jwks`
Dynamic Registration URL	`https://YOUR-HOST/api/v1/lti/register`

Register (Dynamic Registration — recommended)

1. Admin → click your account name → Developer Keys.
2. + Developer Key → + LTI Registration.
3. Dynamic Registration URL = https://YOUR-HOST/api/v1/lti/register → Continue → confirm in LMS Bridge.
4. Leave Permissions + Placements on → Enable & Close.
5. Set the key State = ON; copy the Client ID.
6. Settings → Apps → View App Configurations → + App → By Client ID → paste → Install.

Manual alternative: Developer Keys → + LTI Key (Manual Entry): Target Link URI = /launch, OIDC Initiation = /login, JWK Method = Public JWK URL = /jwks; enable AGS + NRPS toggles; add a Course Navigation placement.

Canvas platform endpoints (record in LMS Bridge → LMS (LTI))

Issuer	`https://canvas.instructure.com`
OIDC auth (auth_login_url)	`https://sso.canvaslms.com/api/lti/authorize_redirect`
Token (auth_token_url)	`https://sso.canvaslms.com/login/oauth2/token`
JWKS (key_set_url)	`https://sso.canvaslms.com/api/lti/security/jwks`

Cloud values shown; for beta/test use sso.beta / sso.test.canvaslms.com.

Instructor places it

Course → Settings → Navigation → drag LMS Bridge into the menu → Save (or Modules → + → External Tool).

After any launch, LMS Bridge auto-provisions the user, course, and role (no extra password). Free & open-source under AGPL-3.0. UI labels verified against current vendor docs (2025–2026); confirm against your LMS version. Full guide: docs/INSTALL_LTI.md.
